SUMMARY	
Co-founder and CTO/COO of Vibeln LLC, a live software company with 2 deployed products used by 1,000+ people. Built and shipped Vibeln (821 registered users, 40% DAU) and ArenaHQ (100–500 active competitive coders) independently as lead engineer. Full-stack across Next.js, TypeScript, WebSockets, WebRTC, and PostgreSQL. Experienced in content strategy, event operations, and pitching to technical and investor audiences. Ready to contribute from day one.	
TECHNICAL SKILLS	
Languages	Python, TypeScript, JavaScript, SQL, C, HTML, CSS
Frontend	React, Next.js, Tailwind CSS, CodeMirror 6
Backend	Node.js, Express, WebSockets, WebRTC, REST APIs, PostgreSQL, Supabase, Redis, Neon, Firebase
AI / ML	OpenAI API, Gemini API, Claude API, Whisper, TensorFlow.js, XGBoost, pgvector
Tools	Git, GitHub Actions, Docker, Vercel, FFmpeg, Tree-sitter, NetworkX, Google Apps Script, Twilio
EXPERIENCE	
Co-Founder, CTO & COO — Vibeln LLC	Jan 2026 – Present Remote
Products: <i>Vibeln</i> (<i>vibeln.us</i>) • <i>ArenaHQ</i> (<i>arenahq.us</i>)	
- Co-founded Vibeln LLC; own all engineering, product, and operations — co-founder leads growth and partnerships - Grew Vibeln to 821 registered users with 40% DAU — organic growth, zero paid acquisition — within months of launch - Built ArenaHQ: live 1v1 competitive coding platform serving 100–500 active coders with real-time ranked matches - Engineered real-time multiplayer systems using WebSockets and WebRTC for live coding sessions and video networking - Designed multi-tenant PostgreSQL architecture with Row-Level Security; integrated Twilio SMS and Gemini AI - Built sandboxed in-browser code execution using Piston API and CodeMirror 6 with multi-language support - Shipped CI/CD pipeline via GitHub Actions and Vercel; managed all production environments end-to-end - Conducted 50+ user interviews; iterated product direction based on retention data and behavioral feedback - Pitched at demo days and entrepreneurship competitions; presented to investor and technical audiences	
Production Operations Staff — USD Athletics	Aug 2025 – Present
- Operated live broadcast, timing, and display infrastructure for NCAA Division I events under zero-downtime requirements - Coordinated real-time event technology across production team during televised NCAA sports broadcasts	
IT Coordinator — NSLS Executive Board	Sep 2024 – Present
- Automated member onboarding workflows using Python and Google Apps Script, reducing manual effort by 50% - Built internal dashboards for membership tracking, engagement reporting, and leadership decision-making - Organized tech-focused chapter events for a 100+ member organization	
Freelance Content Strategist & Ghostwriter	2022 Independent
- Ghostwrote blogs, newsletters, and YouTube scripts for 3–5 independent creators across multiple niches - Developed brand voice, messaging frameworks, and story structures tailored to each creator's audience - Delivered consistent content on deadline for clients building personal brands and online audiences	
PROJECTS	
ALASKA — Encrypted AI Assistant	Top 10 / 100+ teams 48-hour hackathon
- Built AES-256-GCM encrypted voice AI assistant for veterans with crisis detection and accessibility modes - Integrated real-time speech pipeline with secure session management under a 48-hour build constraint	
PRISM — PR Risk Engine	2026
- Built graph-based ML system using Tree-sitter and NetworkX to analyze code dependency changes across pull requests - Modeled post-merge engineering risk using XGBoost with SHAP-based feature attribution	
WTFcode — Developer CLI Tool	2026
- Built AST-based repository compression tool reducing LLM token usage by up to 90% via structured code parsing - Extracts dependency graphs and call hierarchies for context-efficient AI coding workflows	
Scout — AI Accessibility Tool	2026
- Built real-time visual assistance system using TensorFlow.js, OCR, and Gemini API for blind and low-vision users - Designed local-first processing pipeline with AI fallback for minimal latency on device	
EDUCATION	
University of South Dakota	Expected May 2027
B.S. Computer Science • Minor: Innovation & Entrepreneurship	
Coursework: Data Structures, Algorithms, Databases, Software Engineering, Systems Programming, Entrepreneurship & Venture Creation, Technology Commercialization	
LEADERSHIP & ACTIVITIES	
Demo Day & Pitch Competitions	
Pitched Vibeln and ArenaHQ to investor and technical panels at entrepreneurship competitions	
USD INFORMS Chapter	
Built operational planning tools and member management system for chapter leadership	
Campus Tech Events	
Organized and ran tech-focused events at USD; active in the campus entrepreneurship community
