SUMMARY

Computer Science student with hands-on experience managing IT infrastructure, deployment pipelines, and technical operations across multiple platforms. Detail-oriented and dependable with strong troubleshooting skills, customer service instincts, and a track record of resolving technical issues quickly under deadline pressure.

EDUCATION

University of South Dakota

Vermillion, SD | Expected May 2027

B.S. Computer Science — Minor in Innovation & Entrepreneurship

Coursework: Systems Programming, Database Systems, Software Engineering, Data Structures, Algorithms

TECHNICAL SKILLS

Operating Systems: Windows, macOS, Linux (Ubuntu) | Office Tools: MS Windows, MS Office Suite, Google Workspace

Infrastructure: Vercel, Supabase, Neon Postgres, Docker, Git, GitHub, CI/CD pipelines

Languages: Python, TypeScript, JavaScript, SQL | Networking: REST APIs, WebSockets, WebRTC, database access controls, RLS policies

Support Skills: Hardware troubleshooting, software deployment, system configuration, user onboarding

EXPERIENCE

IT Coordinator & Chapter Administrator — NSLS Executive Board

Sep 2024 – Present

University of South Dakota

- Managed digital directories, member databases, and IT infrastructure for a national collegiate leadership organization.
- Built and maintained member tracking pipelines, communication scripts, and onboarding dashboards; reduced onboarding latency by 50% through automation.
- Provided technical support and troubleshooting for chapter operations across multiple concurrent workflows.

Production Operations Staff — USD Athletics

Aug 2025 – Present

University of South Dakota · Part-Time On-Campus

- Operate and maintain live-event audio systems, stadium display boards, and broadcast equipment for NCAA athletics events.
- Troubleshoot and resolve hardware and software issues in real time under high-pressure, zero-margin production environments.
- Coordinate equipment setup, testing, and teardown across multiple concurrent systems before each event.

Co-Founder & Lead Engineer — Vibeln / ArenaHQ

Jan 2025 – Present

vibeln.us · arenahq.us

- Managed end-to-end deployment infrastructure across two web platforms on Vercel and Supabase, maintaining 99%+ uptime for 1,621 registered users.
- Diagnosed and resolved 8+ critical technical incidents — authentication failures, API deprecations, notification system breakdowns — under hard deadlines.
- Implemented database-level access controls, user permission systems, and secure session handling across both platforms.
- Provided ongoing technical support, system monitoring, and configuration management across production environments.

Freelance Brand & Content Consultant

Jun 2019 – Dec 2022

Independent · Remote

- Managed digital asset logistics, brand channel operations, and client communications for 10+ clients; maintained 100% client retention across 3+ years.
- Coordinated deliverables across multiple concurrent accounts under strict deadlines and NDA agreements.

PROJECTS

EKO — AI Background Music & Voice Dubbing System

2026 – Present

- Built and deployed a three-mode AI audio platform serving 821 users with 40% DAU at zero paid acquisition; managed full cloud infrastructure across Vercel, Render, and Neon Postgres.

Vibeln & ArenaHQ — Live Web Platforms

2025 – Present

- Deployed and maintained two full-stack platforms serving 1,621 users; resolved 8+ critical production incidents across authentication, notifications, and real-time systems.

PRISM — PR Risk Intelligence & Structural Modeling

2026

- ML pipeline analyzing code repository structure to predict engineering risk; authored formal research proposals for USD faculty review.

COGN — Cognitive Integrity Layer for AI Codebases

2026

- Open-source GitHub Action that automatically scores pull requests for AI-generated code quality drift against repository baselines.

ALASKA — Encrypted AI Assistant

2026 · Top-10 Hackathon

- 48-hour build: AES-256-GCM encrypted AI assistant for military veterans with crisis detection and accessibility modes — top-10 finish.

PETRI-Verse — Autonomous Multi-Agent AI Simulation

2025

- Built a concurrent 62-agent LLM simulation with tick-based loop; produced an original AI safety finding around emergent self_modify() behavior.

LEADERSHIP & ACTIVITIES

- AI & Entrepreneurship Workshop Facilitator (Self-Initiated) — lead offline sessions for teenagers (ages 13–16) on technology, business fundamentals, and communication skills.
- USD INFORMS (Beacom School of Business) — authored 10-week operational plan; built chapter admin portal.
- NSLS Executive Board — IT Coordinator & Publicity Chair; USD Marketing Club member.
